THE BELIZE VISION

Whether the boat you enjoy now is your first or your fifth, you're quite likely to be thinking about your next boat.

In a process that never seems to cease, we all mentally list the things we'd want different— the ideal boat that lies just over the next swell.

This is perfectly understandable. It's part of the whole magnificent obsession that is boating.

One way this itch could be scratched is to commission your own custom build.

But apart from eye-watering cost, a one-off will also have solo components. The look of the boat may be on its own but so may you. Come resale time, you could find yourself in a market of one.

The ideal is probably a limited production; a boat with enough siblings in the family to gain the mutual benefit of service support, sense of community, and protection of your investment.

Individuality.

Nowadays, surrounded by the great white fleet of anonymous vessels, you can't help but wonder: what happened to character, to distinction, to individuality?

A boat with real soul is invariably descended from vessels whose looks derived from real, practical tasks— like fishing, freight, trading, passengers; only later, leisure and sport.

Their looks evolved slowly, like the human species. And they felt more human.

While there are plenty of 'out there' designs around, they can seem like they're from Star Trek studios. You may get a very different boat, but one that may also date with warp speed.

One other factor:
Why does a beautifully preserved classic boat transfix a whole bay full of modern craft when it glides in?

New Found Respect.

Even accepting that it really is much more practical to build today's (and tomorrow's) boats from more exotic materials than wood,

that still doesn't explain why today's boats can't be special and individual.

We suspect the old timers, if they could've gotten their hands on today's resources, would've seized them with both.

We're also currently witnessing an extraordinary worldwide upsurge of affection for original classics.

Long-neglected thoroughbreds are being teased, with almost archaeological care, from the mud berths of neglect, and restored to levels that out-dazzle even their original incarnations.

THE BELIZE VISION

Some more dedicated (and well-funded) souls are even building painstaking replicas of boats that haven't been afloat for generations, except on the seas of our imaginations.

The sense of all this seems to be: what's the point of owning a boat you can't love?

It's a point not lost on the designers of this new global boat brand, Belize Motoryachts.

An important aspect of the Belize belief system is a determination to source the best, no matter where in the world it exists.

This is especially true when applied to manufacture.

In bygone days, the best boat building might've been clustered in northern Europe or the north-eastern USA. But the 21st century has seen the centre of gravity shift to East Asia, notably Taiwan.

The yard chosen to build Belize boats there may be the best of the best, Kha Shing.

For 35 years now, Kha Shing have built more than 1,300 vessels, ranging from 45 feet, all the way to 185 feet. For brands as respected as Monte Fino and Hargrave and in collaboration with a who's-who of designers including Ed Dubois, Rob Humphries, Ward Seltzer and Tony Castro.

These days, phrases like 'industry-leading' and 'state-of-the-art' can seem over-used. But in the context of Kha Shing's relentless quality focus, such terms can seem almost understatements.

Appropriately, for a boat of Belize's intentions, an ancient Chinese proverb advises, "To understand new things, you need to consider the old".

The Belize team are most impressed with the way the Taiwanese have built on their shipbuilding heritage with an enthusiasm to learn, to adopt ever more complex production techniques, and to fulfil perfect details; like gutters under sliding windows to redirect condensation back overboard, via a hidden central plumbing line.

Kha Shing are not only ISO certified, and build to that quality management standard, (hence the five year structural warranty offered by Belize) but can also construct to a virtual alphabet of international maritime codes, among them CE Mark, RINA, BV (Bureau Veritas), DNV, MCA, ABYC— and NSW Waterways.

Even more reassuring— for us and for them— is that more than 50 percent of their business comes from repeat purchasers; owners pleased enough to tell

Kha Shing, and their own friends, how much they 'love their work'.

Sheer elegance.

If the legendary wooden boats of our past had kept evolving, how might they look today?

Belize could well offer some insights.

We sense they may have stayed with a lower profile than many of today's offerings. Not just for beauty's sake, but because the more tall and top-heavy a boat, the more ungainly and susceptible to windage.

The trick is to have a sweet sheerline and profile without it stealing room below decks. On the Belize, the sheer remains fairly flat until gently rising toward the bow.

But in this case, even good looks can be deceiving; the Belize actually delivers greater space— in the sizing of beds, heads, showers, in fact all living areas— than similar-sized production counterparts.

It's a testimony to very experienced thinking, artful computer-aided design and stronger, less bulky miracle materials. But there are more differences: Unusually for a motoryacht today, the Belize sheer is really the top edge of a substantial

and shippy bulwark— instead of a token toerail— for more secure side access and drier passagemaking.

This bulwark is in turn capped with a shaped teak rail (left natural, but available with four coats of gloss, if desired).

Set atop the caprail is a beautifully electro-polished array of stainless stanchions (32mm rather than 25mm) carrying two horizontal rails that wrap right around the boat, to almost halfway along the cockpit.

The top rail isn't the usual 25 or 30mm pipe, but a 60mm X 40mm elliptical shape that, as the hand falls upon it, feels as substantial as the reassuring traditional teak handrail of days gone by — without the vulnerability and maintenance.

The Surface Below the Surface.

As you well know, the geometry beneath any planing powerboat is crucial to performance.

Belize was never going to make do with some off-the-shelf version, nor even settle for creating their own in the absence of propulsion data.

First prize, really, is to design in conjunction with the particular drive setup a boat will have.

Because Cummins Zeus pod drives had been agreed upon for the 54, the boat's running surface was primarily penned on that specific basis. First, by Ocean Yacht Designs, then reviewed by Cummins's own in-house naval architects.

With all their approvals in hand, the hull was then taken to the Australian Maritime College (AMC) in Tasmania, for two rounds of tank testing.

Further shape tweaks were made during AMC's testing; all the time improving efficiency, (a reduction in running trim angle, for instance, as well as a nice bonus of 'less effective power required') and resulting in a shape beautifully mated to her power source.

Essentially, it's a warped-plane hull with a very fine entry, and strong flare decreasing

to a fairly flat run aft— a deadrise of 12 degrees.

Further aiding efficiency are pod tunnels scooped into the aft section, protecting props and allowing a proper keel to assist tracking, with a very substantial turn-down chine in the bow to deflect spray and deliver a more dry and silky ride offshore.

The boat simply proceeds in a stately fashion, in keeping with her exterior style.

In more traditional times, the actual profile of the bow itself might've been dead plumb. But at the speeds we're able to drive our boats today we need buoyancy forward; we don't need a bow that will dig into a wave (this is not an ocean race) but lift over it. Hence the slight spoon arc of the bow, at any sort of speed slicing a glassy sheet of water that turns into spray further down the flanks.

Following this wake along, almost halfway down the hull we start to detect the gradual compound curve of the hull's tumblehome, becoming quite pronounced at the transom.

This reverse curve is more than sensual, it's also practical; placing less weight up high in the hull and offering protection from slamming— against a jetty, or rafted companions.

Subtle Signs.

The superstructure shape on the Belize is also somewhat less bluff than traditional predecessors. The coach roof is angled just enough to shed headwinds and shrug off spray, but upright enough to provide good volume in passenger spaces.

Note too the way the roofline swoops down, ever so gradually, almost to mid-cockpit.

Elsewhere, visual cues recall art deco influenced boats of the 20's and 30's (when they were referred to as 'gentlemen's launches').

You can sense this style in the round port lights; the triangle of circular deck hatches up forward; the chunky, sculpted communications mast, that can be painted to key with the distinctive selection of hull colours; as well as the sleek, fluted gills of the engine air intakes that visually continue the taper of the side windows.

At the rear of the deckhouse there's another clever feature: the rear, toughened-glass openable bulkhead is curved outward, top to bottom.

The effect of this, from the inside looking out, is that of an even more roomy and glowing saloon.

A more gracious time. And place.

As the cradle of our civilisation, Europe still— quite deservedly— influences our design sensibility. Even so, we tend to take it with a grain of salt.

We try to cherry-pick and adapt ideas to suit different cruising distances, light levels and lifestyles, in many locations.

The Belize designers have struck a keen-eyed balance between European panache and Australian practicality.

Throughout any Belize yacht, fabric panel walls, leather, weatherproof leatherette and passages of woodgrain are used in a contemporary palette to create a warm and inviting ambiance, and to contribute to excellent acoustics.

Two pack polyurethane finishes accent and protect key surfaces in the galley, on door panels and other key joinery interludes.

High lustre is not, by any means, the answer to every décor decision; a number of Belize interior surfaces are quite muted. Satin varnish, for instance, is evident throughout the saloon, galley, helm, companionway and forward cabin threshold.

Galley bench tops offer a choice of natural solid surface materials.

The Miele name badges the induction cooktop, combination oven, and microwave.

The AC/DC Vitrifrigo system provides two capacious chiller drawers and a separate freezer drawer.

The dual bowl sink is served by award-winning German Grohe tapware.

Right across from the galley, on the starboard side is the true heart of the saloon; a large L-shaped seating area that does double duty as lounge and dinette. (Or triple duty, with its clever purpose-built storage for crockery, glassware and charts tucked under.)

The saloon's opening side windows allow for natural ventilation, but when the temperature calls for it, you can waft a good 24,000 BTU's of air conditioning through saloon, galley and helm areas.

Speaking of which: let's take a closer look at the helm station.

Certainly no stock-standard 'dash'; this seems like something from a Geneva Motor Show prototype—almost more automotive than maritime.

Centre stage is a joystick control, two 15-inch Raymarine multifunction glass screens flanked by a pair of Smartcraft digital tachometers, Wema fuel and water gauges, a chain counter for precision anchoring, electronic engine controls, automatic trim tabs (with manual override), electric steering with adjustable wheel, standard auto-pilot, and cockpit video cameras keeping you in the picture on boat extremities.

All this can be controlled from the Treben Italian electric leather helm seat, with a matching passenger seat that has a fore-and-aft chaise lounge lying alongside.

Below Decks, Above Standard.

But it is full-sized beds and roomy staterooms that fill the Belize down below.

Rarely seen on a motoryacht of this style and size, the master stateroom extends the full beam of the boat. Its large queen-size mattress a very cossetting eight inches thick, with storage under its baseboard.

Rising at your command is a 24-inch TV/DVD.

Either side of this cabin space are twin cedar-lined hanging and drawer spaces and, on each side, opening port lights for cross ventilation, backed up by 16,000 BTU's of air conditioning—split with the ensuite head.

In there, teak floors are satin varnished, with non-slip finish in the large frameless glass shower stall, with elegant Grohe fittings again providing the tapware and shower fittings.

The same high specification is shared by the VIP ensuite/dayhead forward: including semi-recessed porcelain sink, opening portlight and insect screen, round deck hatch overhead, plus cedar-lined timber storage lockers.

Every bit as opulent as the master, the VIP stateroom itself occupies the entire forward V-section: carpet to your choice, portlights to port and starboard, round hatch overhead, makeup drawer with folding seat and mirror, its own 24-inch TV/DVD and dedicated 12,000 BTU air conditioning.

The third, guest suite, is slightly less grand but no less highly specified.

Here there are twin upper and lower berths, hanging locker, bedside table and

drawers, its own 4,000 BTU air conditioning and the benefit of an opening portlight, circular deck hatch above and plush carpeting below, fleecy between your toes.

This cabin is a great example of the Belize belief in "no second-class accommodation".

In Its Elements.

Time spent on a luxury machine such as the Belize 54 is as much an outdoors experience — maybe more so — than it is an indoor one.

A lot of attention has been devoted to making the most of that experience.

A huge sunpad sprawls along the centreline of the forward deck, drink holders and music controls right alongside.

Going aft, the swim platform's centre section raises and lowers hydraulically (its teak decking standard, by the way).

This grants easy access to the transom's electric 'garage' door and space for a three-metre tender and outboard that can be easily loaded by the built-in electric winch.

Above the garage, there's another hatch that lifts to reveal the electric BBQ and sink, with helpful LED lighting in the raised hood overhead.

Backed up to that, in the cockpit is a rear lounge with good storage under, and a folding, multi-use hi-lo table.

More storage again (you can't have too much) is provided by the wet bar with fridge and icemaker console and its adjacent mezzanine seat (replaced with the stair ladder on the 54 Flybridge).

To the port side, an unusual, and most welcome feature: a cosy corner breakfast bar with folding stools.

By sunset, of course, it serves nicely as an ideal spot for drinking in the view.

Harnessing Technology.

The sense of any classical or retro references quickly disappear when we examine the technical side of the 54.

There's nothing at all nostalgic or backward-glancing about resin-infused composite construction, double vinylester outer skin, or watertight, stepped collision bulkhead and independent foam-filled hull

compartments. Or a deck both screwed and glued to the hull, with the final seam girded by a full-perimeter 60mm 316 stainless steel rub rail.

About the only backward-looking aspect in the engineering department is the twin aft-facing Cummins Zeus 3000 bronze pod drives, with through-hub underwater exhausts and very advanced lightweight, immensely strong carbon fibre driveshafts to reduce weight and horsepower loss.

Delivering all the 600 horsepower available are twin, highly-evolved Cummins QSC, 6-cylinder turbocharged diesels.

Mated to the highly-refined hull, you can look forward to a top speed of around 30 knots, a 25 knots cruise and a comfortable range, at 22 knots, of 400 nm, still leaving a safety margin of 10% reserve fuel.

Boating's learned a lot in the many decades since the golden age of wood.

Like anti-vibration engine mountings on two-pack, white epoxy-coated I-beams.

And double layers of acoustic and thermal lagging that swathe the engine room — even on the ceiling — all faced with white perforated aluminium insulation panels.

No doubt the old world of analogue needle gauges would find it hard to believe a

vessel entirely wired and monitored using BEP CZone digital switching, networked to an 8-inch touchscreen.

Or battery banks providing backups for the backups: four Mastervolt 24v sealed GEL batteries for engines alone, four more for domestic service, and even a dedicated 120AH GEL just for generator starting. As well as two battery chargers; plus an inverter to power the Bose sound system, some three LCD TV's, and icemaker.

Would the old craftsmen think it overkill to install some four electric bilge pumps, have each ball valve in polished stainless, fit anti-siphon loops, Head Hunter odourless sanitary hoses and double hose clamps on every underwater fitting?

They wouldn't. Nor do we.

But they might well shake their heads in wonder at the joystick controls for close quarters manoeuvring. To say nothing of Raymarine GPS connected to the Cummins autopilot/skyhook touch pad.

And old heads would certainly shake even more at the very posh, silent, fresh-water-flush Techma toilets, replete with high gloss teak seats and lids.

Few and Far Between.

As attractive as all these Belize benefits might be, desirability is no substitute for availability.

The reality is, there will be a very finite number of Belize Motoryachts built each year.

Another upside is that it means you are not going to see another Belize in every anchorage or marina you drop into. You will own and command something quite different and unique.

So attaining your ideal might involve a waiting list as much as it might a wish list.

BELIZE 54 SEDAN MOTORYACHT

BELIZE 54 SEDAN MOTORYACHT

BELIZE 54 SEDAN MOTOR YACHT

The Belize 54 Sedan. One continuous level of luxury.

The Sedan owner could well be new to boating and just wants it to be as easy and simple as possible. But they could just as easily be a veteran cruiser who has owned Flybridge vessels but no longer wants split-levels and stairs, either in their boat, or their living quarters on terra firma.

Unlike many of today's leisure vessels that developed as 'game boats' and come with bridge decks either fully enclosed or with all-around clears, this boat's primary purpose is less about chasing lunch as more social pursuits. Not so much about catching fish, as catching up.

Back in the classic era this configuration was also called a 'sedan', where double doors opened directly on to the cockpit area, making one big holiday space. Today, this style is generally termed a Sport Yacht.

The advantages of such a layout are many

but the main one is the convenience of every activity being available on one single, flowing level. Everything is right to hand: helm, galley, saloon, dining, bar, entertainment systems; all within the comfort and protection of a roomy weather-proof space.

But this style can also provide the best of both worlds; with a lift-away glass bulkhead making way to the large cockpit and extending the entertaining out to the open air.

It also offers another way to bring the outdoors in, either while under way or at anchor, when, with the press of a button, a giant sunroof slides open to the clouds and the stars.

In cooler months, with the roof snugged shut, there's the option to open the internal thermal blind beneath, to stream sunlight into the saloon via the e-glass panels that, in high summer, filter fierce heat and glare.

SPECIFICATIONS

Length Overall (inc. swim platform & bow sprit)	54'01"	16.50 m
Beam	16'06"	5.03 m
Maximum Draft	3'6"	1.05 m
Dry Weight	49,604 lbs	22,500 kg
Sleeping Capacity	3 cabins 6 adults	
*Water Capacity	184 US gallons	700 litres
*Fuel Capacity	634 US gallons	2400 litres
Holding Tank Capacity	100 US gallons	380 litres
Standard Engines x2		
Cummins QSC 600 Zeus® Pod drive	600 hp	442 kw
Generator Onan EQD		17.5 kw

**Tank capacities are total volume; usable capacity may vary due to vessel trim and sea state.*

BELIZE 54 DAYBRIDGE MOTORYACHT

BELIZE 54 DAYBRIDGE MOTORYACHT

BELIZE 54 DAYBRIDGE MOTORYACHT

The Belize 54 Daybridge. All you could want, with something extra on top.

Having sung the praises of the completeness of the one-level Belize Sedan, it may seem almost contradictory to introduce a Daybridge sister.

But experience again informs the Belize designers of a demand that's just as enthusiastic for this kind of variant.

Flybridge lovers aren't necessarily an age group. Nor a psych-socio-graphic, they simply have different needs.

They may be more traditional boaters keen to embrace the outdoors and the weather in all its moods. They will relish the wind-in-the-hair and sun-on-the-face experience that a Flybridge affords.

They could just as easily be parents, or grandparents, who welcome an extension to the main entertaining area, or a separate fun space for children.

And those living in higher latitudes, where

every warm moment of a very short season is seized upon, will find it an ideal way to make the most of it.

Both boats' main decks are identical as far as saloon, galley and accommodation areas.

On the Daybridge, though, an elegantly curving deep-tread staircase leads up from the cockpit.

Every bit as sociable as the main saloon, the Daybridge area has a large L-shaped lounge and hi-lo table that can drop to create a second sun pad. Opposite is a wet bar with sink and fridge. And a second station acts as a day helm and offers the essential navigation aids.

Obviously a bimini can be added, but full clears are probably unnecessary. When weather becomes too hot, or cold, the Daybridge cover can be snapped on, the stair-ladder hatch closed and a retreat made to the cosy protection of the lower saloon and main helm.

SPECIFICATIONS

Length Overall (inc. swim platform & bow sprit)	54'01"	16.50 m

THE STRENGTH AND DEPTH BEHIND BELIZE MOTORYACHTS

Belize Motoryachts are owned by Riviera, an Australian success story and a major international marketer of luxury pleasure boats. Our growth over more than 34 years has resulted in a company that today creates and manufactures three individual model collections and supports an international dealer network that spans more than 60 countries. We are also Australia's most awarded pleasure boat manufacturer.

The secret of our success is an absolute commitment to quality. Be it our 400 strong team of people, our work practices, materials, tools and technology, environmental responsibility or after sales service, we are rigorous in pursuing the highest standards.

Our craftspeople consult world-leading naval architects, engineers and designers. Our employment and training practices have also earned us many local and national awards.

Riviera operate the largest luxury boat building facility in the Southern Hemisphere and boasts some of the most sophisticated technology available.

34 YEARS OF RIVIERA

SINCE 1980

Our PASSION
To create the *ultimate* boating experience.

I ♥ RIV

AWARDED FOR EXCELLENCE

Riviera's vast collection of industry awards earned over the last three decades is a reflection of the pride and passion our master craftsmen put into every model in our premium range of Australian-built luxury pleasure craft.

The home of Australia's Riviera. The 14 hectare state-of-the-art manufacturing facility on the Gold Coast in Queensland. This is the largest luxury boat building facility of its kind in the Southern hemisphere.

RIVIERA'S ETHOS
INSPIRES CONFIDENCE

The quality of our service is commensurate with the quality of our boats and is something we are passionate about. The experience of purchasing your Belize Motoryacht, from the selection of the electronics and décor, to the regular service and maintenance will all be carried out reliably, promptly and smoothly. In fact, you can count on us, and our global dealer network, for the life of your boat.

It is this consistent quality that has created Riviera's enormous and ever-growing international appeal.

Today there are over 5000 Riviera luxury boats located in all corners of the globe.

A sensational and growing choice of models, an impeccable pedigree, excellent value and outstanding service: now more than ever, the reputation of Riviera and Belize for quality with integrity inspires confidence in boating enthusiasts the world over.

The growing Riviera and Belize global network of dealers now spans 60 countries

ELECTRONICS

Electronics play an ever-increasing role in the pleasure, performance and safety of luxury boats, and the choice of equipment that is available today is vast. In fact, selecting the equipment that meets your needs can be a very challenging task. R Electronics is here to help: we source the best systems and products from around the world, we are experts at matching technology to individual requirements and work closely with Riviera's design team and Riviera's global Dealer Network to create systems that maximise your pleasure and safety.

RElectronics.com.au

STYLE

A passion for quality and good design steers everything we do at Riviera — and that is reflected in our exclusive range of clothing, accessories and decor items. If you love your Riviera, you'll feel at home with the Riviera Collection: casual yet stylish, comfortable, practical and made to withstand the rigours of boating life.

The Accessory and Decor Collection ranges from a storm jacket to stylish crockery. Riviera has the total leisure and style solution.

RStyle.com.au

INTERIORS

To make your boat truly your own, we offer a wide choice of fabrics, finishes and color schemes that allow you to customise your Riviera. Of course, we also have experienced designers who can advise and assist with your individual selection.

It is a real pleasure to own and use things that are aesthetically pleasing, work well and last — and because it is only appropriate that such qualities are found on board a Riviera, we supervise each individual interior scheme from creation to installation.

RInteriors.com.au

THE ULTIMATE BOATING EXPERIENCE

When you buy a Belize or Riviera Motoryacht, you are really joining a family.

Indeed, this "Riviera Experience" is something we take very seriously and value very highly – we believe our core duty is to help owners of our world-class, luxury pleasure craft to achieve the ultimate boating experience.

So you can imagine how proud we are that this commitment is something highly valued by members of our Riviera and Belize "family" of owners too.

With exclusive invitations to special adventures, social events and educational workshops, the "Riviera Experience" runs much deeper than owning a striking, sophisticated and stylish boat which not only looks a cut above the rest but also delivers in terms of superior sea-handling and innovative on-board technology.

Perhaps our passion is best reflected in the words of our proud boat owners:

"A top priority for us was to have a vessel with speed and performance to enable us to run for shelter as the need arose, and we decided that 54 feet with a tender garage would be perfect."

"The boat building process was an exciting journey, as we had exacting criteria drawn from our cruising experiences, and the Belize was built to accommodate our boating idiosyncrasies."

"A key item for us is the ability to manoeuvre in close quarters and the Cummins Zeus Drive system with the joystick control works well. No more jumping onto marinas, just step off the boat as it approaches a pontoon."

And one more ...

"Riviera and Belize go over and above all expectations to make sure owners enjoy a great experience for the entire life of their boats. That lifelong commitment is something that really makes a difference."

Yes, they are glowing endorsements and they are all from long-time owners who share something truly unique – they share the truly unrivalled "Riviera Experience".

Our PASSION

To create the *ultimate*
boating experience.
